

Technical Data Sheet

5618 Airbrush Cleaner

Water-Based Paint Material

VOC 95.86 g/l

Contains Propylene Glycol Monomethyl Ether Acetate

Description

5618 Cleaner is a water-based paint material used to rinse colors from the airbrush between colors. 5618 may also be used to dilute Createx Colors paints.

Usage Cleaner

- Spray 5618 in between colors while painting to partially clean airbrush or spray-gun before using next color.
- Compared to 4011, 5618 is a milder cleaner. When adding 4030 to Createx Colors paints and clears, flushing colors with 4011 is more effective compared to cleaning with 5618.

Dilutant

- Spray 5618 in between colors while painting to partially clean airbrush or spray-gun before using next color.
- Add 5618 to Createx paint or clear 5 – 10% per volume.
- Compared to 4011, 5618 leaves a higher gloss level in the finished coating. If using Createx 5620 Gloss Clear or 4050 UVLS Gloss Clear, diluting with 5618 creates a glossier coating by about 10%.

Pot-Life & Storage

5618 does not create a pot-life when added to paint.

Store in an air-tight container in a cool, dry environment away from direct light.

Health & Safety

Use in a well-ventilated area. Avoid contact with eyes. Wash hands thoroughly with soap and warm water after use. Do not ingest. When spraying or sanding, use a properly-fitting respirator per the manufacturer's instructions. Eye contact: Rinse with clean water for 15 minutes. Seek medical attention. Inhalation: Use in well ventilated areas and wear a respirator.

Refer to 5618 SDS for additional information.
